Visitor Management System

Protect & Manage your visitors data.

Trak it - Visitor Management System

Trak It helps you handle everything that comes through your front door and bring visitors registration to a new level.

Easy Check-In/Check-Out
The system accepts partial NRIC or mobile number as an identification. If it already exists in database, it will retrieve visitor's information automatically.

Automatic Check-Out
Situations where visitors forget to scan out, the system will automatically check out based on user definable setting.

Print Badge
Badge layout will be customized and printed to card or label or paper printer.

System Security
This software offers password security which only authorized personnel can access through.

History Listing/Reports
The system allows users to search/filter the history information of visitors by pending logout, visitor's name, host's name, partial NRIC, date in and type of visitor.
